TREE PEONIES

King of Flowers

Ancient Chinese called the tree peony, the King of Flowers. They lend charm to the garden because they are beautiful, rare and hardy.

These shrubby counterparts of the familiar perennial are distinguished principally by their woody stems but usually they are taller with bigger flowers and they begin to bloom two or three weeks earlier than ordinary peonies. These spectacular shrubs grow to a height of three to four feet.

Once a tree peony has been seen in full bloom, many other plants will seem unattractive by contrast. The immense beautiful blossoms display graceful, often crinkled petals, which sometimes look as if they were made of crepe paper. All varieties have a delicious fragrance. The shapely, fine cut leaves of these majestic shrubs suggest an appearance of tropical luxuriance.

Since the branches do not die back to the ground in winter as do those of soft stemmed kinds, tree peonies are able to put forth buds in fall. They thus develop faster than other species in Spring and by the time they are several years old, are capable of blooming in great profusion. After the flowering period, the new sprouts gradually turn to wood during the summer. Buds form on this wood and the process continues.

GARDEN ACCENT

A tree peony is a notable plant and may well be given a place of honor. A single specimen can hold the focal point in an intimate garden. Two make handsome accents on each side of steps or the entrance path. Four can be used in a balanced design at the corners of a flagged area or of a rectangular pool. A group of these plants is spectacular if backed by lilacs. In bloom together, the shrubs and peonies may well be the most colorful section of the garden.

The peony shrubs originally grew wild in the mountains of China. They were imported into Japan and also, about 150 years ago, into Europe. On both continents, hybridizers have been at work improving them.

TYPES — COLORS

At the present time, three distinct types can be distinguished—the European, the Japanese and lutea hybrids. The European type is usually very double and has broad foliage. Japanese tree peonies have single to mostly semi-double blooms, nearly always with a beautiful cushion or circle of yellow stamens in the center. Leaves are much finer and thinner than in the European. The lutea hybrids originated from a cross between the wild lutea and the other oriental varieties. These lutea hybrids are difficult to propagate and very rare.

The colors of both European and Japanese tree peonies range from pure white through pale pink, rose, salmon and cerise to deepest red. The Japanese have a much broader range than the European. Lutea hybrids display colors and shades all their own. Yellow ranging from clear tones to orange tints, vie for the visitor's attention with combinations of yellow and red. Some of these are unsurpassed even by the rose. In the Japanese there are clear whites, pinks, salmons, reds and maroons that cannot be described in words. The daintiness of the semi-doubles and the airiness and sparkle of the full double, beggar description.

Tree peonies begin to flower in this area about May 15th to 20th. The lutea hybrids open last, about May 20th to 30th. Some varieties lend themselves to forcing. All are easy to grow in most parts of the country. They have been known to survive winter temperatures of twenty to thirty degrees below zero and will endure more neglect the year round than most plants.

CULTURE

Though it is almost impossible to kill a tree peony by neglect, a little attention means better flowers and a handsome shrub. Well-drained soil is to be preferred and sunlight for the greater part of the day.

If they are set rather deeply in the ground, they will be induced to produce new shoots or sprouts from the roots, thus a bigger shrub will result. They need four-foot spacing, since fully grown specimens are that high and almost as wide. Steamed bone meal or a commercial fertilizer low in nitrogen but high in phosphoric acid and potash are most commonly used. Manure is inadvisable for any peony.

Since the plants are hardy, they need no protection after the first winter. Young specimens, however, should be covered with leaves or any other protective cover. In severe winters, an occasional limb may be killed by extremely cold winds but this does not affect the rest of the plant. The dead wood can simply be cut off in Spring. Although subject to no serious disease, specimens may be threatened by botrytis. If a branch suddenly wilts and droops, it should be broken off. The shrub will continue to grow. Botrytis seldom kills a tree peony. Spraying with Bordeaux during the early growing stages will act as a deterrent.

This list represents the finest collection of tree peonies ever offered in this country—some varieties have never been offered before. We are the largest importers of tree peonies and our collections are most complete. We regard the Japanese varieties vastly superior in beauty and freedom of bloom. Of the European listed, we regard them as the best. Lutea hybrids are excellent growers and have been known to bloom from a two year old plant.

We have many other varieties, young and specimen sizes, in small quantities—not enough to list—try us for varieties you seek.

Delivery will be made in the late Fall or early Spring, at proper planting time. Special discount of 5% on orders over \$50.00.

It is advisable to purchase young plants. Although small, they are vigorous and may bloom the first Spring after planting, surely the following Spring. If you want good established plants which have bloomed, buy our specimen sized plants 4 to 10 years—all best quality. Unless you are familiar with the various varieties, we suggest you allow us to make the selection. We guarantee complete satisfaction. Tree peonies are so scarce, the supply is not sufficient to meet the demand. We suggest naming a second choice or granting us the privilege of substituting an equal or better value. If nothing is said, we will do so.

We have small quantities of plants unidentified because of lost labels. We offer these at \$3.00 for young and \$5.00 for specimen size.

Terms—Cash with order—F.O.B. Sands Point, L. I., N. Y.

All better collectors, hobbyists and specialists are our customers.

TREE PEONY SEEDS

For the first time in many years these rare, finest of all seeds are available. They have been carefully selected from the best Japanese varieties—no seeds from seedlings, all from named varieties.

Tree peony seeds can be planted outside or in flats. They will germinate the second Spring after planting, sometimes the first Spring. Plant one-quarter inch deep, one inch apart—water well. Transplant after second set of leaves. Use ordinary soil where drainage is good. Seeds may be planted in Fall or Spring.

Price \$5.00 per 100—shipped in Fall or Spring.

JAPANESE VARIETIES

(Price of all young plants \$4.75 — Specimen \$8.50 — unless otherwise stated.)

ABOKIU (Imperial Palace)—Excellent dark crimson, beautiful semi-double.	
AKASHI JISHI (Lion of Akashi)—Fine, full rose double, one of the largest pinks, great favorite of collectors.	
ADZUMA KAGAMI (Mirror of the East)—Fine lilac rose double, good variety.	
AKASHI NISHIKI (Akashi brocade)—Enormous peach pink, yellow variegated, rare variety, double.	
ANKAMON (No translation)—Large watermelon pink, semi-double, excellent.	
ARASHI YAMA (Maple mountain)—Russet tinged rose, double, very large	\$6.00
AKASHI GATA (Shore of Akashi)—Fine light pink, extremely large, full double, a famous beauty.	
ASAH MARU (Circle of the Morning Sun)—Gorgeous semi-double of lustrous, cherry pink.	
ASAH MINATO (Haven of rising sun)—Bright red, immense, tall double, fragrant.

YOSHIN (Nursing God)—Rich, deep cherry pink, full double, beautiful.	
YUKI DORO (Snow road)—Old favorite, white double, scarce, first introduction since war.....	\$6.00
YUKI ZASA (Snow upon the leaves of Bamboo)—Pearl white, large double, yellow and red center.	
YUTAKA NO HARU (No translation)—Immense scarlet, full double, rare, most beautiful.....	\$6.00

WINTER FLOWERING VARIETIES

The following tree peonies of this class have a peculiarity to bloom at odd times and to flower from November to February. Should be treated as follows: Pick flower buds as soon as they appear, thereby causing them to reserve full energy for late Autumn buds. In early September, cut away all leaves from stems to stimulate Autumn buds for winter blooms. Put them in frost sheltered place when frost comes—excellent for South or Pacific Coast.

KIKOKU (Good news)—Scarlet of great beauty, beautiful center, semi-double.....	\$6.00
YUKI GASANE (Snow drift)—Pure white double, globular shaped, excellent.....	6.00
TOGAWAKAN—Deep red, full double, fine plant.....	6.00
TAISHO BENI (Taisho scarlet)—Fiery scarlet, many petallocks, semi-double of rare beauty.....	6.00
KURI HA BENI—Russet red, large double, gorgeous.....	6.00
NURE GARASHU—Deep purple, large double of great beauty.....	6.00

EUROPEAN VARIETIES

(Fine Young Grafts)

BIJOU DE CHUSAN—Full double, best of European whites.
 COMTESSE DE TUDER—Very fine double, salmon rose, beautiful.
 FRAGRANS MAXIMA PLENA—Large double, flesh pink and salmon, fragrant.
 GLOBOSA—Gigantic double, beautiful flower, white with red splashes.
 JEANNE D'ARC—Flushed salmon pink, double, great favorite.
 LOUISE MOUCHELET—Very large, salmon rose, immense double, beautiful.
 MME. EDWARD SENECLAUSE—Very large, vivid rose red, old favorite.
 MME. STUART LOW—Cup shaped, salmon red silvery border, popular.
 REINE ELIZABETH—Large pure pink, with copper tints, best European pink.
 SOUVENIR DE DUCHER—Large, double, purple striped white at edges.

FAMOUS LUTEA HYBRIDS

(Fine Young Grafts)

ALICE HARDING—Rarest of all Lutea hybrids, double, ball shaped, magnificent fragrance.....	\$15.00
CHROMATELLA—Pure sulphur yellow, large, double, fragrant.....	4.75
FLAMBEAU—Large double, bright, salmon red, purple veins, fragrant.....	6.00
L'ESPERANCE—Clear primrose yellow, very fragrant, rare, magnificent.....	8.00
LA LORRAINE—Large double soft yellow, delightful fragrance, rare.....	4.75
MME. LOUIS HENRY—Cup shaped, buff pink shaded salmon, fragrant, beautiful.....	8.00
SATIN ROUGE—Double, immense, broad satiny blood red, fragrant.....	8.00
SOUVENIR DE MAXIME CORNU—Very large double, fragrant, profuse bloomer, great favorite.....	4.75
SURPRISE—Large straw yellow double, salmon and purple blend, fragrant.....	8.00

TREE PEONY SPECIES

LUTEA-LUDLOWII—formerly Tibetan Form—new tree peony species—brilliant yellow with blooms high above beautiful foliage. Greatest advance in hybridizing will result from crossing on this variety.
 Young plant\$15.00

HERBACEOUS PEONIES

In the following list, we offer the best of peonies for the expert, the collector and the back yard grower. The selections are those which have proven to be hardy, easy growers and will be found to be the best of the cut flowers and exhibition varieties. We offer excellent 3 to 5 eye divisions with well-balanced root systems, at prices consistent with quality of roots. We can supply any peony in commerce, not listed. Send us your required list.

Special collections for beginners, exhibition and cut flower varieties at reduced prices. Types are double, semi-double, Japanese and single.

Double—are full double or have stamens that are not prominent.

Semi-double—show prominent stamens with several rows of guard petals and center of yellow stamens.

Japanese—one to three rows of guard petals and center of staminodes usually yellow or edged and tipped yellow. Stamens partially transferred into petals. Very attractive.

Single—one to two rows of guard petals with center of yellow pollen bearing stamens and anthers, graceful and artistic.

The peony is easy to grow, needs no coddling and increases in value the older it gets. It is famous for its fragrance and general beauty. Peony culture is simple. Dig a hole about 12 to 18 inches deep and about as wide. The plant should be inserted in the hole, so that the eyes will be about two inches below the surface. Fill in the soil around the plant, firmly packing soil about the roots. Water well before hole is filled. Cultivate frequently until early Fall. The best planting time is from September 1st until December 1st. The soil should be of ordinary garden variety, the same type used for annuals and perennials. When planting, use super phosphate or bone meal. Manure is to be used only when completely dried and only in bottom of the hole. A bordeaux spray in April and May will help the plant along.

Terms—Cash with order—Shipment late Fall or early Spring, F.O.B. Sands Point, L. I., N. Y.

EXCLUSIVE HERBACEOUS PEONIES

Experts in Japan have been writing continuously about a genuine, full double, pure YELLOW HERBACEOUS peony, which they have named "Aurea." It was first found by a well-known nursery, who entrusted the growing of this herbaceous peony to Japan's foremost expert on herbaceous peonies, who grew it in limited quantities. The few plants were sold to various fanciers and our agent was fortunate in obtaining a few plants at great cost. We are offering 10 plants at \$35.00 each, delivery late Fall or early Spring.

ANOTHER EXCLUSIVE

After three years of effort, two of the best peony experts in Japan, selected the five outstanding herbaceous peonies there. We are fortunate to offer them in limited quantity. Growers description below:

IKUENOYUKI—Snow white full double, enormous flower, flowering stems are very strong, excellent for cut flowers.

HYOGO-JIMAN (Pride of Hyogo)—Vermillion (cinabar) full double, brilliant large flower.

HAKUSA-SEISHO—Snow white, full double, in the middle shaped blue, very large, beautiful.

NAGAO-NO-TAKARA (Treasure of Nagao)—Very thick lustrous blackish purple crimson, full double, big flower.

NARA-NO-YADA—Light vermillion like Chinese lacquer, full double, brilliant flower.

PRICE: \$5.00 each.

EXCLUSIVE — SEVEN NEW HERBACEOUS VARIETIES

EUROPEAN SHOW WINNERS

All are 1950 introductions, raised and selected about twenty years ago, tested thereafter for strength of stem, general vigor and freedom of bloom.

The color descriptions given are of the Color-chart of the Royal Horticultural Society, London, England. Shown at progressive Peony Show at Boskoop, Holland, in June 1949; the only exhibit which received a Gold Medal.

Shown at the R. H. S. Show, London, England and all selected for trial at Wisley by the R. H. S. Committee.

Shown at Haarlem, Holland, June 1949 and awarded first class certificates by a special Committee.

BLUSH QUEEN—A lovely creamy white double peony, tinted very slightly rose, free flowering, excellent substance—\$5.00

BORDER GEM—A distinct, bushy and compact growing peony. Outer petals shrimp-red (HCC 161/3) inner petals chartreuse-green (HCC 663/3). A real gem for the flower border—\$5.00

BOWL OF BEAUTY—Very fine Japanese type. The larger outer petals are fuchsia rose (HCC 25/2) and the inner small toothed petals are of a pale lemon yellow color (HCC 601/3). The flowers are 6-8 inches on strong stems. The best variety of this type is Mrs. Hemerik and it is a great improvement on that variety—\$6.00

VOGUE—Indeed a delightful variety, very soft rose with a silvery white reflex. Exceptionally large flowers, full double—\$5.00

GAYBORDER JUNE—Another free flowering full double, vigorous new peony. Flowers fuchine rose, thickly petalled, a perfect variety for the flower market and for exhibition—\$6.00

SNOW CLOUDS—Ivory white, base of petals empire yellow as of Adonis (HSS 603/3). When opening, very slightly rose shaded, outstanding double—\$5.00

WHITE WINGS—An enormous graceful, pure white single, beautiful yellow center, largest single of all—\$5.00
We offer entire collection for \$30.00.

TWO HERBACEOUS NEW FOREIGN INTRODUCTIONS

PETER BRAND—Large full double, lustrous ruby red, sparkling petals of fine texture, best red at many European shows—very few divisions available. \$6.00 each.
KAKODEN—Our agent has obtained exclusively, this sensation from Japan—double, glistening white, opens easily, fragrant, excellent for cut flower trade, fine exhibition variety—few divisions available—fine divisions—\$7.00 each.

HERBACEOUS SPECIES

CORIAEEA—We have the only stock in limited quantity, available in this country. This species produces brilliant lavender hybrids—\$25.00 each.
ARIETINA—Dark red, single—\$2.00 each
CORALLINA—Purplish red, single—\$2.00 each
DECORA—Deep purple—\$2.50 each
HUMILIS—Bright red—\$2.00 each
CHAMELEON—Rare, beautiful pink, early
WOODWARDII—Another rarity, blush to soft pink
MLOKOSIEWITSCHI—True yellow, rare

MACROPHYLLA—Purple—\$2.50 each
PEREGRINA—Bright crimson—\$2.50 each
PUBENS—Rosy red—\$2.00 each
MOLLIS—Pink—\$2.00 each

OFFICINALIS

Alba Plena—Double White \$ 1.00
Altro Rubra Plena—Brilliant crimson 1.50
Lobata—Cerise Salmon 2.00
Mutabilis—Rose Changing to White 1.50
Rosea Superba—very full soft pink 1.50
Rubra Plena—Deep red 1.00
Tenuifolia—Fern leaf peony 1.00

HERBACEOUS HYBRIDS

KEWANEE	2.00	RED WARRIOR	3.00

IRIS KAEMPFERI

Higo Strain

Three of the largest growers in Japan collaborated on the selection of the best Higo Iris—this strain is superior to all others. After three seasons of close study, these experts selected 69 varieties, which has since been reduced to 26 in this list. These were selected from hundreds of varieties. Several of these are new introductions since the war and these, in addition to others on this list, have never before been shipped to this country. These should not be confused with the ordinary quality Higo Iris strain of Iris Kaempferi, which were exported to this country by unscrupulous dealers, given some of the names in this list and are now being sold at low prices in this country.

Our Iris are all truly named, superior to any list ever offered. This collection will create excitement among Iris Kaempferi fanciers because of their brilliance of color, size and refinement of blooms and plant growth. These will create new standards by which all Iris Kaempferi of the future will be compared. Original description of each variety, as given by the Japanese growers.

1. ASHIGARA-YAMA—Gigantic crimson—birch, white sprays, some white stripes, lustrous, round petals, beautiful double	\$ 2.00
2. CHIYO-SAKAE—Beautiful brilliant crimson, big white stripes, wide petals, wide double	1.50

Selected seed from above varieties—\$4.00 per 100.

AZALEAS — RARE

EXBURY HYBRIDS—Raised in the world famous gardens at Exbury, England, by the late Mr. Lionel de Rothschild. These are the finest hardy Azaleas in the world far superior to any other strain. Their magnificent flower trusses are in the glorious shades of cream, yellow, orange, apricot, flame, pink, rose, crimson and scarlet. The plants are of robust habit, reaching a height of 5 to 7 feet.

9 to 12 inch fine plants—\$4.75 each

We are fortunate to be the first to offer these in this country. Delivery next April—limited quantity—available supply will be sold quickly—we suggest you order immediately.

GHENT HYBRIDS—HARDY—These famous azaleas will be delivered in April—we have sold thousands in this country. Their exquisite, big flowers in pastel shades, many fragrant, have made them very popular.
